

Instatrace 3.0 Release Notes

Major Features

Workflow Tracing

Instatrace now provides detailed tracing capabilities for workflows, allowing users to see the exact path taken by a workflow and the status of each step along the way.

Conditional States

With the new conditional states feature, users can define branching logic within their state machines to handle different scenarios based on conditions.

Custom Metrics

Instatrace now supports custom metrics, giving users the ability to define their own metrics for tracking and monitoring workflows.

Enhancements

Improved Visual Workflow Creation

Visual workflow creation has been enhanced with new drag-and-drop capabilities and improved support for large workflows.

Enhanced Workflow Execution

Workflow execution has been optimized for faster and more reliable processing, with better handling of error conditions and improved retry logic.

User Interface Improvements

The user interface has been updated with new icons and improved navigation, making it easier and more intuitive to use.

Fixed Issues

Several bugs have been fixed in this release, including issues with state machine transitions and visual workflow display.

Upgrade Notes

There are no breaking changes in this release.

Installation Notes

To install this release, please follow the instructions provided in the documentation.

We hope you enjoy this release of Instatrace, and as always, we appreciate your feedback. If you have any questions or comments, please don't hesitate to get in touch.
